And so where are we on payment? I was told \$50M on Thursday. This is untenable. We can't be here every week because of these processes. We can't stick to our commitments and all credibility is shot.

We just sat through a briefing of restoration times and this very thing blows that out of the water. Do we want Puerto Rico to have power or not? FEMA does!
FEMA has provided funding!

What needs to be done to get payment today?

The update is appreciated. Please understand that this is one of two huge issues. Beyond the amendments is payment. I will be forced to ground our aviation units Monday due to lack of payment. I have reached a point with our LOC that I must receive payment and consistency in cash flow before I am able to pull down additional funds against our LOC.
